

PRODUCT OVERVIEW:

Master Microbiotics is a clinically validated bioregulator formula designed to optimize gut health by re-colonizing the microbiome with potent, spore-based Master Microbes and supports gut healing with the regenerative BPC-157 peptide.*

Utilizing our patented Phyto MicroEncapsulation Technology, this formula delivers beneficial probiotics directly into the small intestine, where they are needed most. Clinically proven to survive the digestive tract's harsh environment, Master Microbiotics is the next-generation solution for enhancing digestion, immune function, and overall wellness.* With its advanced technology and powerful probiotic strains, Master Microbiotics is the most effective, science-backed way to maintain a balanced, healthy microbiome for peak performance.*

Restore your gut's health, boost your immune system, and enhance overall well-being with Master Microbiotics.* Take control of your health with the power of targeted, spore-based probiotics and advanced microbiome technology.

MASTER MICROBIOTICS KEY BENEFITS:

Supports Digestion - enhances gastrointestinal function by rebalancing gut flora and reducing digestive issues like bloating and gas.*

Boosts Immune System - strengthens natural defenses, supporting overall health, reducing inflammation, and promoting resilience in the digestive tract.*

Improves Mental Health - supports the gut-brain axis which directly works to enhance mental clarity, mood, and focus.*

Promotes Detoxification - helps eliminate toxins by maintaining a healthy, thriving microbiome, crucial for optimal detoxification.*

Optimizes Nutrient Absorption - ensures efficient uptake of nutrients for better overall health and vitality.*

Promotes Healthier Aging - supports skin health, collagen production, and reduces oxidative stress, contributing to healthier aging.*

WHAT ARE PEPTIDES?

Master Microbiotics combines Master Microbes, probiotic strains, and **BPC-157**, a **peptide** studied for its role in gut health and cellular function. But what are peptides?

Imagine **unlocking the secret to youthful vitality** by improving your body's natural communication system.* As we age, our cells begin to lose their vibrational energy, leading to sluggish performance, visible signs of aging, and diminished overall health. **Peptide bioregulators are the game-changer your body has been waiting for.**

These **revolutionary molecules** act as **messengers within the body**, restoring the signaling capacity of your cells and helping them function like they did in their prime*. By addressing the **root cause of cellular dysfunction**, peptide bioregulators **recharge your body from within**, promoting enhanced energy, faster recovery, and a renewed sense of wellness.*

Peptides are the **future of health**—providing powerful, targeted support for optimal living while **making your current wellness supplements have an even greater impact on your health.***

WHO SHOULD TAKE MASTER MICROBIOTICS:

- **Individuals with Digestive Issues** – Ideal for those struggling with bloating, gas, constipation, or other gastrointestinal discomforts.*
- **Anyone Over 30** – As we age, our microbiome and gut health naturally decline. This bioregulator helps restore balance and vitality.*
- **Active Lifestyles & Athletes** – Enhance recovery, support energy production, and promote digestive health after exercise.*
- **People with Weakened Immune Systems** – Those looking to strengthen their immune defenses can benefit from this potent probiotic blend.*
- **Anyone Seeking Mental Clarity & Mood Support** – Those needing mental focus and cognitive support will benefit from the gut-brain axis connection.*

Supplement Facts

Serving Size: 2 Capsules
Servings Per Container: 30

Amount Per Serving	% Daily Value
BioLimitless Proprietary Blend	1000 mg †
BPC-157	†
Lactobacillus acidophilus W22	
Lactobacillus plantarum W1	
Lactobacillus plantarum W21	
Lactobacillus paracasei W20	
Lactobacillus salivarius W24	
Lactococcus lactis W19	
Bifidobacterium lactis W51	
Bifidobacterium lactis W52	
Enterococcus faecium W54	

† Daily Value not established.

Other Ingredients: Starch, HPMC (capsule shell), Fructooligosaccharides (FOS), Inulin, Dextrin, potassium chloride, hydrolyzed rice protein, magnesium sulphate, amylase, vanilla flavor, maltodextrin.

USAGE INSTRUCTIONS:

Adults: Take 2 capsules daily, preferably first thing in the morning or as directed by your healthcare practitioner.

Consult your healthcare provider before starting any new supplement regimen. Do not use if tamper seal is damaged.

KEY INGREDIENTS:

BPC-157 – A cutting-edge peptide celebrated for its regenerative properties, supporting the gut lining's natural repair processes and digestive resilience.*

Bifidobacterium lactis W51 – Supports digestion, immune health, and reduces symptoms of IBS and constipation.*

Bifidobacterium lactis W52 – Enhances gut health by inhibiting harmful bacteria and promoting a balanced microbiome. It also helps in the production of essential vitamins such as B12 and K2.

Enterococcus faecium W54 – Maintains gut flora balance and alleviates inflammation and gastrointestinal discomfort.*

Lactobacillus acidophilus W22 – Improves lactose digestion, supports vaginal health, and boosts the immune system.* It also contributes to the reduction of cholesterol levels.*

Lactobacillus paracasei W20 – Enhances gut barrier function, skin health, relieves IBS symptoms, and supports immune function.*

Lactobacillus plantarum W1 – Known for its role in suppressing pathogenic bacteria and reducing bloating.*

It also supports the production of anti-inflammatory compounds.*

Lactobacillus plantarum W21 – Similar to W1, it helps in reducing gut inflammation and promoting a balanced microbiome.* It aids in the absorption of nutrients and supports mental health by influencing the gut-brain axis.*

Lactobacillus salivarius W24 – Improves digestion, supports vaginal health, and boosts the immune system.* It also aids in the digestion of proteins and the production of lactic acid.

Lactococcus lactis W19 – Supports digestion, immune function, and reduces inflammation.* Important for dairy fermentation, this strain enhances the digestive process and boosts the immune response. It also helps in the production of beneficial enzymes and vitamins.

Together, these probiotics create a balanced gut environment that favors beneficial microorganisms over harmful ones, thereby helping to rid the body of Candida, fungi, and parasites.*

WHAT MAKES MASTER MICROBIOTICS UNIQUE?

There are five blue zones in the world: Okinawa (Japan), Nuoro and Ogliastra (Sardinia, Italy), Icaria (Greece), the Nicoya Peninsula (Costa Rica), and Loma Linda (California, USA) – and it is believed that people live longer, happier lives in these five places. A common thread that has been found in all these communities is a high degree of social interaction that keeps their members active and with good self-esteem. But not only do they benefit from it for these reasons, it has recently been discovered that intense social life involves sharing some friendly bacteria (probiotics), which enrich their microbiota and, apparently, promote longevity. **Master Microbiotics contains these powerful blue zone strains from all over the world and brings them to your family in a single formula.**

Unlike traditional probiotics, Master Microbiotics is a **potent bioregulator** that stands apart due to its use of **Phyto MicroEncapsulation Technology**, a patented delivery system that ensures these innovative ingredients survive the acidic environment of the stomach and effectively reach the small intestine.*

This unique technology **enhances the stability, bioavailability, and absorption** of both the Master Microbes and BPC-157, allowing them to **synergistically colonize the gut, support gut lining health, and deliver maximum benefits.**

WHAT MAKES MASTER MICROBIOTICS UNIQUE? (CONT.)

Unlike traditional probiotics, which often fail to survive digestion, Master Microbiotics **ensures its ingredients reach their target**—the small intestine—to provide the **most impact**.*

This formula features a blend of high-quality, **spore-based Master Microbes and BPC-157**, specifically chosen for their ability to **enhance digestion, support immune function, and promote overall health**.* The combination of advanced science, potent probiotics, and regenerative BPC-157 makes Master Microbiotics a results-driven solution for **optimizing gut health, boosting immunity, and improving overall digestive performance**.*

THE CLINICAL SCIENCE BEHIND MASTER MICROBIOTICS:

The balance of microorganisms in the gut plays a pivotal role in maintaining optimal health. Master Microbiotics is designed to replenish the gut with beneficial probiotics that can effectively colonize and thrive in the small intestine. **Studies have shown that the unique probiotic strains in Master Microbiotics can improve energy levels, digestion, immune function, and even mental health by optimizing the gut-brain axis**.* The proprietary Phyto MicroEncapsulation technology ensures that the active bacteria reach their target destination, surviving stomach acid and supporting long-term gut health.

An 8-week observational study on Master Microbiotics demonstrated significant improvements in energy, digestion, and overall well-being, with participants reporting better sleep, reduced inflammation, and improved skin health. This groundbreaking formula is backed by clinical evidence, ensuring it delivers lasting health benefits without any adverse effects.

FREQUENTLY ASKED QUESTIONS:

How does Master Microbiotics work?

Master Microbiotics is a powerful bioregulator that utilizes patented Phyto MicroEncapsulation Technology to ensure its advanced ingredients—including spore-based Master Microbes and regenerative BPC-157—survive stomach acid and reach their target, the small intestine.* Once there, the Master Microbes colonize the gut and balance the microbiome, while BPC-157 supports gut lining health and promotes absorption and repair.*

This innovative delivery system improves the absorbability of the formula, ensuring its ingredients are delivered where they are needed most.* Unlike traditional probiotics, which are often destroyed before reaching the intestines, Master Microbiotics ensures its components provide maximum benefits for digestion, immunity, and health.*

How many capsules should I take each day?

For best results, take 2 capsules daily, preferably in the morning or as directed by your healthcare professional.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

FREQUENTLY ASKED QUESTIONS (CONTINUED):

Can Master Microbiotics help with digestive issues?

Yes, Master Microbiotics is formulated to reduce bloating, gas, and constipation by promoting a healthy balance of gut bacteria, improving overall digestive function.*

Is Master Microbiotics suitable for people with weak immune systems?

Absolutely! Master Microbiotics strengthens the immune system by supporting the gut's natural defenses, improving overall immune function and working to help reducing inflammation.* As with all dietary changes and additions, we always suggest that you talk with your healthcare professional prior to use.

Can I take Master Microbiotics alongside other supplements or medications?

Consult your healthcare provider before starting any new bioregulator regimen, especially if you're already taking other medications or supplements.

Where do our peptides come from?

Our research-quality peptides are sequentially synthesized using naturally occurring amino acids, creating specific peptide bioregulators with 99% purity and maximum strength. Unlike plant-based peptides, which are derived from external sources and lack the precise bio-regulating capabilities your body needs, these lab-engineered peptides are specifically designed to mimic the body's natural cellular signaling molecules.

This precision ensures they deliver consistent and targeted support, helping to optimize cellular function and restore balance.*

These peptides are clinically proven to stimulate cellular activity, our peptides go beyond what plant-based alternatives can offer, providing unparalleled support for energy, recovery, and overall health.*
